

# A Visit to the Building for Kids

## Second Floor Exhibit Exploration

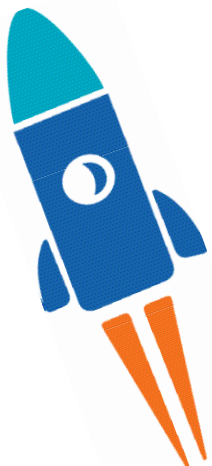

Today, I am going to visit the Building for Kids Children's Museum. There are a lot of great exhibits I can explore. Will you explore with me?

First, I stop at the Welcome Desk to sign in. Here, I am greeted by a staff member who is wearing a mask. I can sanitize my hands at the sanitizing station.

Then, I go to the exhibits. Today, we are staying on the second floor and can stay for up to an hour. There are clean toys in plastic bins and plastic bags. These are for me to use while I play.

The first exhibit I want to explore is called Move It. I can use levers, pulleys, and ramps to change the path of bright balls shooting through clear tubes. It is so fun watching where the balls go.

Across the way is the Clubhouse.  
I can use pretend food to cook  
dinner or play house with my  
family.

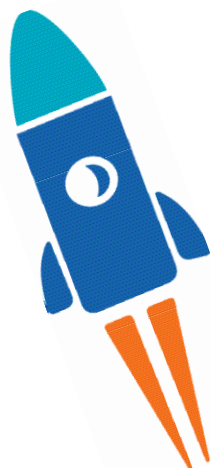

The Amazing Heart Slide is one of my favorites. It looks like a 10-foot tall human heart. I can climb up inside and slide back down.

Look, the Crane! I can operate the crane, use a conveyor belt, build with bricks, and move blocks with a wheel barrow.

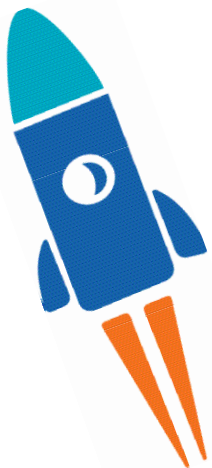

The fire truck exhibit is fun too. I can pretend to drive the truck or put out a fire.

Next is the Clubhouse Sports exhibit. In this exhibit, I can play basketball, build a putting green obstacle, and explore the golfball physics playground.

One last exhibit is open for play. Babies and Toddlers Around the World is a space specifically designed for kids age 0-3, but anyone in my family can use it today as long as we are mindful of that. We can explore textures, sounds, colors, and different terrains.

There is a bathroom near the fire truck exhibit just for my family to use today. If we need to wash our hands or use the toilet, this is the bathroom we will use.

When our hour at the museum is over, we will hear a staff member announce it on the speaker system. It's time to head home!

I had so much fun at the Building for Kids Children's Museum. I cannot wait to go back again soon. Thank you for exploring with me. What do you want to do next time you visit the Building for Kids?
