

# A Visit to the Building for Kids

## First Floor Exhibit Exploration

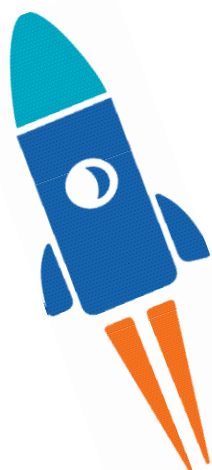

Today, I am going to visit the Building for Kids Children's Museum. There are a lot of great exhibits I can explore. Will you explore with me?

First, I stop at the Welcome Desk to sign in. Here, I am greeted by a staff member who is wearing a mask. I can sanitize my hands at the sanitizing station.

Then, I go to the exhibits. Today, we are staying on the first floor and can stay for up to an hour. There are clean toys in a plastic bin and plastic bags. These are for me to use while I play.

First, I stop at the Doll Hospital where I can take care of the babies.

I can check out with pretend food at the convenience store.

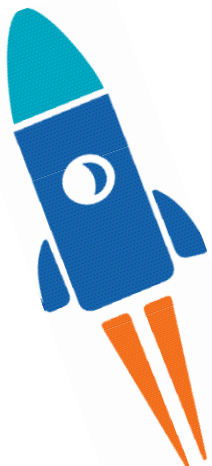

I can pretend to drive a semi truck in the Big Rig Depot. There is a pretend engine I can work on and blocks I can stack or sort.

I can find the airplane exhibit next. I can pretend to be a pilot or work in the control tower. I can even see what it feels like to be a passenger on the aircraft.

There is a bathroom near the airplane exhibit just for my family to use today. If we need to wash our hands or use the toilet, this is the bathroom we will use.

When our hour at the museum is over, we will hear a staff member announce it on the speaker system. It's time to head home!

I had so much fun at the Building for Kids Children's Museum. I cannot wait to go back again soon. Thank you for exploring with me. What do you want to do next time you visit the Building for Kids?
